

## Tenant Challenges:

One of the challenges we face is people's homes, because they still reside in the property during the renovation. Working around; new babies, health problems, and physical limitations. This can cause challenges to our schedule.

Tenants have thought there will be no dust created in the home; simply not true...however we do respectfully make every effort to keep that to a minimum.

Weather can also be a challenge if wind is over 56 KM/H it is determined unsafe to work on lifts.

Rain and wind, does also present a challenge and we have to take extra precautions not to cause water damage to the flooring from moisture.
